**Inmate Property Storage Conveyor S-100** simplifies inmate property handling. Used in correctional facilities; its design benefits are to eliminate pipe racks and or bulk storage and reducing the number of property room attendants. Engineered to meet the long term needs of any correctional facility, our S-100 system is equipped with features such as electronic soft start/stop, low voltage controllers, heavy duty and durable low maintenance conveyor components.

Let SRS Inmate Property Storage Conveyor S-100 provide the solutions for your property storage requirements!

## Inmate Property – Assigning / Loading

The attendant assigns a location on the conveyor for the new inmate based on availability. By simply entering in the location number on the S-100 controller located conveniently, the conveyor will take the shortest route bringing the designated location to the access point which is within close proximity and easily accessible to the clerical desk. The attendant removes the empty bag from the conveyor and places the inmate information on the document sleeve of the property bag. The hanger is easily removed from the property bag by the attendant and the bag is handed over to the inmate to place their belonging inside. The bag is handed over to the attendant who will place the hanger back on to the bag and place the bag on to the conveyor.

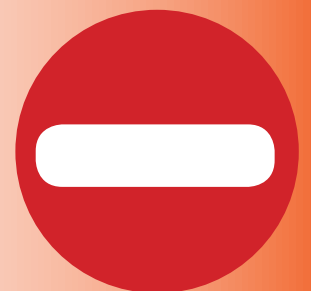

## Inmate Property – Returning

The attendant simply enters in the inmate's property bag location on the S-100 controller. The conveyor will take the shortest route bringing the designated location to the access point which is within close proximity and easily accessible to the clerical desk. The property bag is removed from the conveyor. After taking out the hanger, the bag is handed over to the inmate to retrieve their belongings. Empty bag is then placed on the conveyor for future use.

## Safety and Security

SRS Inmate Property Storage Conveyor S-100 is fully designed to maintain security, safety and sanitation. The system is closed in completely and access is limited to only authorized staff. Since Access to the property room is limited and the properties are efficiently organized, it is less likely that property can be lost or stolen.

# Automated S-100 Conveyor controller features

- Shortest path taken
- Stacks multiple requests
- Prioritize the queue
- Forward and reverse manual control
- Secondary hand or foot control integration
- Remote terminal control - optional
- Accommodates multiple tier conveyors
- Network of multiple conveyors via daisy chain
- Full integration with property storage management software systems

## Property Storage Bags

We carry a wide variety of property storage bags. Made from solid vinyl coated fabric with a mesh fabric panel, the conveyor bags help control odor as well as provide ventilation.

- Comes complete with removable heavy gauge chrome-plated hanger
- Heavy-duty lockable brass zipper provides maximum security
- Includes document sleeve and inside pocket with velcro closure
- Grommets in bottom panel provide additional ventilation
- Designed for use with automated conveyor system

## Benefit Summary

- Only one person is required to operate the system
- Fast property retrieval
- Space savings/maximum space utilization
- Low maintenance
- Heavy duty long lasting components
- Integrate with existing database
- Optional enclosed or open track design
- Caterpillar or sprocket drive options
- Reduce lost property claims
- Flexibility for future growth
- Low energy consumption
- Integrate with facility database

# Inmate Property Storage Conveyor S-100: Specifications

Each Inmate Property Storage Conveyor S-100 is a customized solution engineered to meet your needs; the system is completely modular and very flexible. The system can be designed to fit your building, your volume and your budget.

## **Other Products designed, fabricated and installed by SRS as follows:**

- Auto Uniform Conveyor S-700
- Power and Free Overhead Conveyors
- Garment Conveyors
- Automated Sort Conveyors
- Garment Monorail
- Garment V-Rail
- Steam Tunnel Conveyors
